

Department of Energy

§910.366

data produced under an award for research, development, and demonstration may be protected from public disclosure, then the contracting officer must insert in the award the standard clause in appendix A to this subpart entitled “Rights in Data—Programs Covered Under Special Protected Data Statutes” or, as determined in consultation with DOE patent counsel and the DOE program official, a modified version of such clause which may identify data or categories of data that the recipient must make available to the public.

(2) An award under paragraph (e)(1) of this section is subject to the provisions of paragraphs (d)(2) and (3) of this section.

(f) *Rights in data—SBIR/STTR programs.* If an applicant receives an award under the SBIR or STTR program, then the contracting officer must insert in the award the standard data clause in the General Terms and Conditions for SBIR Grants, entitled “Rights in Data—SBIR Program”.

(g) *Authorization and consent.* (1) Work performed by a recipient under a grant is not subject to authorization and consent to the use of a patented invention, and the Government assumes no liability for patent infringement by the recipient under 28 U.S.C. 1498.

(2) Work performed by a recipient under a cooperative agreement is subject to authorization and consent to the use of a patented invention consistent with the principles set forth in 48 CFR 27.201-1.

(3) The contracting officer, in consultation with patent counsel, may also include clauses in the cooperative agreement addressing other patent matters related to authorization and consent, such as patent indemnification of the Government by recipient and notice and assistance regarding patent and copyright infringement. The policies and clauses for these other patent matters will be the same or consistent with those in 48 CFR part 927.

§910.364 Reporting on utilization of subject inventions.

(a) Unless otherwise instructed, a recipient that obtains title to an invention made under an award shall submit annual reports on the utilization or ef-

forts to obtain utilization of the invention for at least 10 years from the date the invention was first disclosed to DOE (Utilization Reports). Utilization Reports shall include at least the following information:

- (1) Status of development;
- (2) Date of first commercial sale or use;
- (3) Gross royalties received by the recipient;
- (4) The location of any manufacture of products embodying the subject invention; and
- (5) Any such other data and information as DOE may reasonably specify.

(b) To the extent data or information supplied in a Utilization Report is considered by the recipient to be privileged and confidential and is so marked by the recipient, DOE agrees that, to the extent permitted by law, it shall not disclose such information to persons outside the Government.

[80 FR 53238, Sept. 3, 2015]

§910.366 Export Control and U.S. Manufacturing and Competitiveness.

(a) *Export Control.* Any recipient of any award for research, development and/or demonstration must comply with all applicable U.S. laws regarding export control.

(b) *U.S. Manufacturing and Competitiveness.* It is the policy of DOE to ensure that DOE-funded research, development, and/or demonstration projects foster domestic manufacturing. Funding opportunity announcements (FOAs), therefore, may require that applicants submit a “U.S. Manufacturing Plan” in their applications. Such FOAs may encourage U.S. Manufacturing Plans to include proposals by recipients and any sub-recipients to manufacture DOE-funded technologies in the United States; however, the FOAs will also state that these plans should not include requirements regarding the source of inputs used during the manufacturing process. Regardless of whether such plans will be part of the merit review criteria or a program policy factor, and to the extent legally permissible, all awards subject to this subpart, including subawards, for research, development, and/or demonstration, must include a provision that provides

plans by the recipient and any subrecipients to support manufacturing in the United States of technology developed under the award. The recipient and any subrecipients must agree to make those plans binding on any assignee or licensee or any entity otherwise acquiring rights to any subject invention or developed technology covered under the award. A recipient, subrecipient, assignee, licensee, or any entity otherwise acquiring the rights to any subject invention or developed technology may request a waiver or modification of U.S. manufacturing plans from DOE. DOE will determine whether to approve such a waiver in light of equitable considerations, including, for example, whether the requester satisfactorily shows that the planned support is not economically feasible and whether there is a satisfactory alternative net benefit to the U.S. economy if the requested waiver or modification is approved.

[80 FR 53239, Sept. 3, 2015]

§910.368 Change of control.

(a) Change of control is defined as any of the following:

(1) Any event by which any individual or entity other than the recipient becomes the beneficial owner of more than 50% of the total voting power of the voting stock of the recipient;

(2) The recipient merges with or into any entity other than in a transaction in which the shares of the recipient's voting stock are converted into a majority of the voting stock of the surviving entity;

(3) The sale, lease or transfer of all or substantially all of the assets of the recipient to any individual or entity other than the recipient in one or a series of related transactions;

(4) The adoption of a plan relating to the liquidation or dissolution of the recipient; or

(5) Where the recipient is a wholly-owned subsidiary at the time of award or novation, and the recipient's parent entity undergoes a change of control as defined in this section.

(b) When the Federal share of the financial assistance agreement is more than \$10,000,000 or DOE requests the information in writing, the recipient

must provide the contracting officer with documentation identifying all parties who exercise control in the recipient at the time of award.

(c) When there is a change of control of a recipient, or the recipient has reason to know a change of control is likely, the recipient must notify the contracting officer within 30 days of its knowledge of such change of control. Such notification must include, at a minimum, copies of documents necessary to reflect the transaction that resulted or will result in the change of control, and identification of all entities, individuals or other parties to such transaction. Failure to notify the contracting officer of a change of control is grounds for suspension or termination of the award for failure to comply with the terms and conditions of the award.

(d) The contracting officer must authorize a change of control for the purposes of the award. Failure to receive the contracting officer's authorization for a change of control may lead to a suspension of the award, termination for failure to comply with the terms and conditions of the award, or imposition of special award conditions pursuant to 2 CFR 910.372. Special award conditions may include but are not limited to:

(1) Additional reporting requirements related to the change of control; and

(2) Suspension of payments due to the recipient.

[80 FR 53239, Sept. 3, 2015]

§910.370 Novation of financial assistance agreements.

(a) Financial assistance agreements are not assignable absent written consent from the contracting officer. At his or her sole discretion, the contracting officer may, through novation, recognize a third party as the successor in interest to a financial assistance agreement if such recognition is in the Government's interest, conforms with all applicable laws and the third party's interest in the agreement arises out of the transfer of:

(1) All of the recipient's assets; or

(2) The entire portion of the assets necessary to perform the project described in the agreement.
